Installation Document

CanaraExamManager

"Student Result Processing System"

Developers:

Rahul J - 191132718

Seenu Vasan - 191132719

Deeraj S - 191132708

Installation Steps:

1. First Install Tomcat Server on your server machine and configure it to run on your device.
2. Secondly set manager password for Tomcat Server in Tomcat-Users XML file, which you will find in config folder of your tomcat folder.
3. Go to Tomcat Welcome Page and then go to Manager App and add the Student Result Processing System War File. Then you can host the website in any domain doing the above procedures in the server.
4. Install MySQL select complete version and then set password as Canara@575001. For change in the password contact the developers.
5. Run the MYSQL Queries in the MySQL Command line.

Now your software ready to be hosted.
